Frogans

The roll out of Frogans technology will allow the publication of a new kind of site on the Internet with a new addressing system

Фроганс

Ролл из Фроганс технологии позволит публикацию нового вида сайта в Интернете с новой системой адресации

Frogans sites: small, secure, multi-platform, multi-device

Network-name*Site-name

Latin

имя сети*имя-на-сайте

Cyrillic

- Frogans sites: developed once and accessible across all devices connected to the Internet

- New addressing system, same browsing experience and display across all devices

- Sites viewable via Frogans Player downloadable free-of-charge from the OP3FT

A project for innovation and business creation
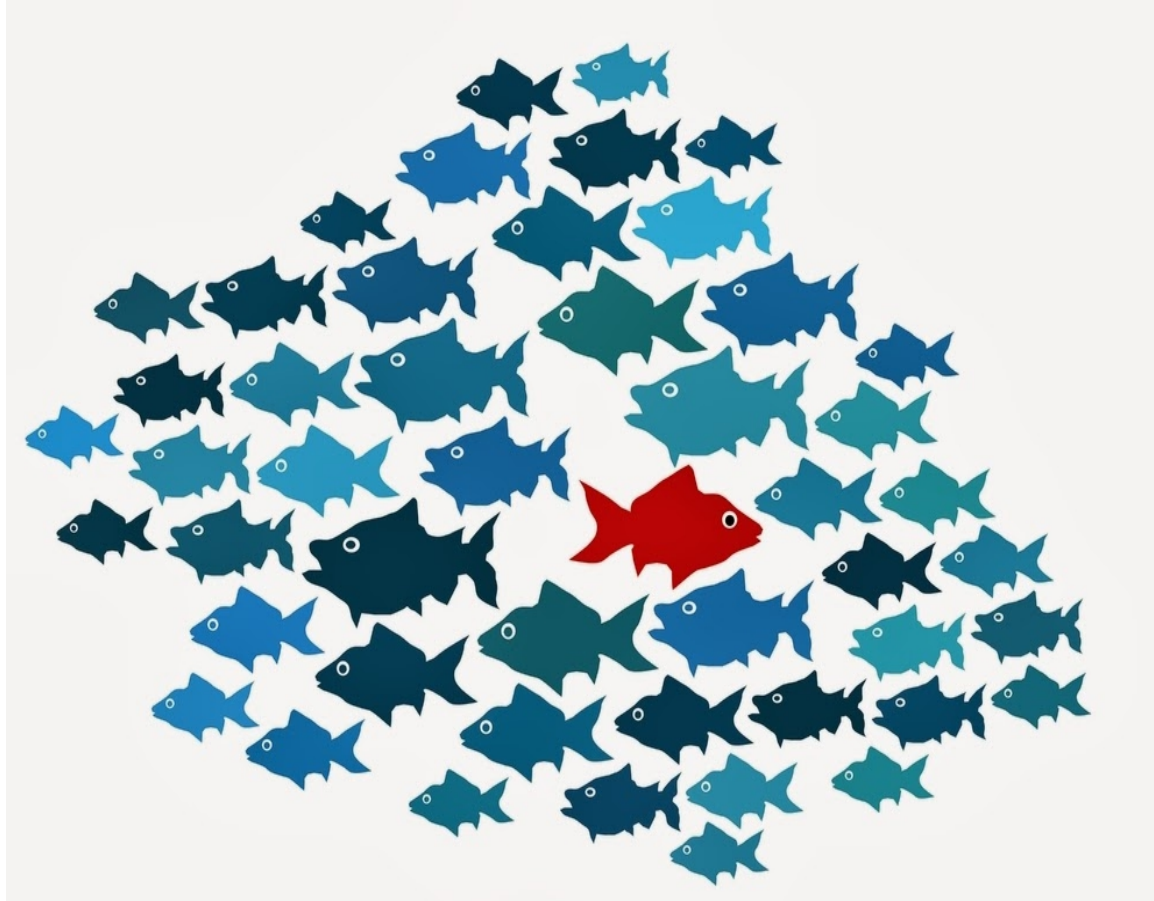

WWW

Walled gardens

Security risks

Limited control over personal data

Compatibility issues

Cost issues and increasingly complex
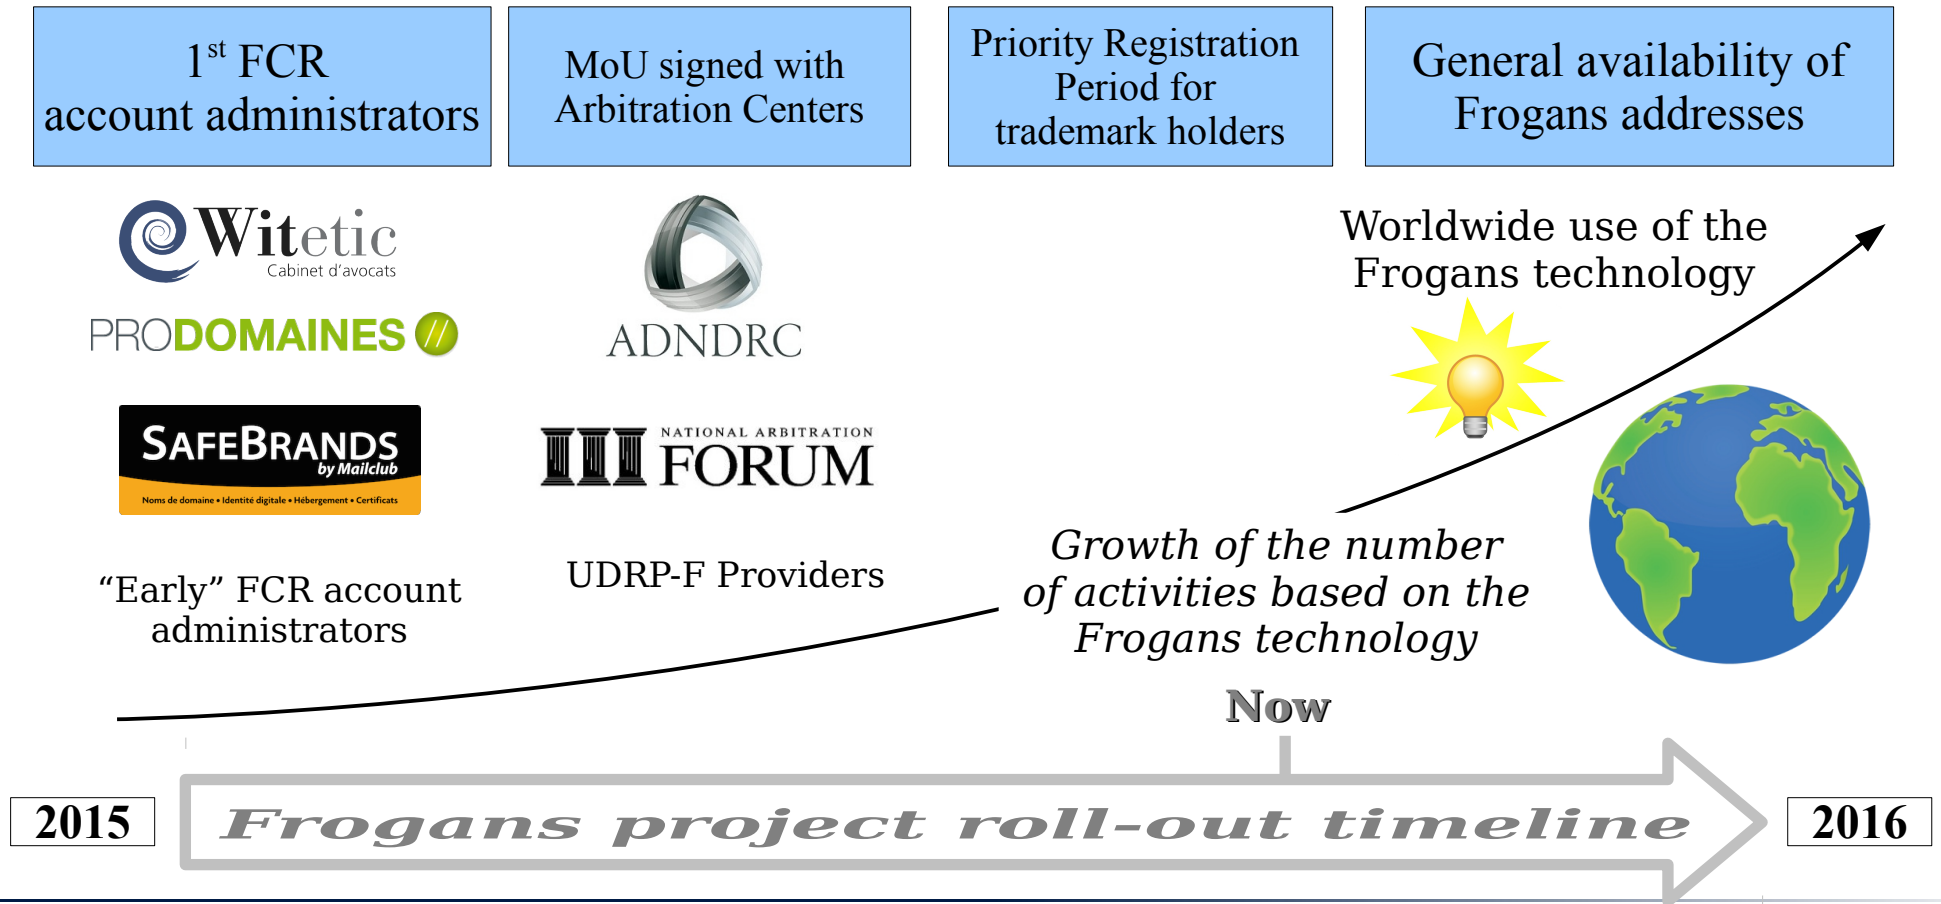

FROGANS

Open space for innovation

Secure

Complete control over personal data

Cross platform technology

Inexpensive & easy!

- Project led by the OP3FT, Paris-based non-profit with public interest mission

- Technology deployed in the form of an open standard for the Internet

- New opportunities for developers, designers, entrepreneurs, trademark holders
